

Purchasing Your Domain Name from GoDaddy®.com*

Below are the steps to purchase your domain name:

- 1) For your convenience, a direct link is provided on our website. Go to: <http://www.parrottalkdesign.com> and go to the **Helpful Links** page. Click on the **"Need a Domain? GoDaddy \$7.49 .com Sale"** text link in the lower left.
- 2) On GoDaddy's Home page, under **"Start your domain search here..."**, type in your desired domain name in the white field. For example, I would type in "parrottalkdesign" for my domain. Then, click the orange "GO!" button.
- 3) On the next page, it will state if your desired domain name is available or not. If it is available, then select your desired domain(s) by checking the check box next to each domain you wish to register. It will give you more options below. After you have selected all of your desired domain names, click the green "Add" button.
- 4) On the next page, SKIP ALL of the additional add-on options (unless you decide to purchase more domains). If no other domains are desired, then click on the "No Thanks" button.
- 5) Next, on the Domain Registration Information page, either create a new GoDaddy.com account or log in to an existing account. Type in the requested information, then click the orange "Next" button.
- 6) If creating a new account, write down your customer number, user ID, and password (and anything else they ask). You may need to create a 4-digit PIN. If so, please write this down, too. I may need some of this info to activate your domain.
NOTE: the password is case-sensitive, so please write down the upper & lower case letters exactly! For better security, it is recommended that your password contain both letters and numbers, with both upper & lower case letters.
NOTE: Once you purchase a domain, your personal contact information can be viewed by others. You may want to purchase a Private Registration and Domain Protection service for your domain(s) if you prefer to keep your personal information private. For more information, go to: <http://www.godaddy.com/gdshop/dbp/landing.asp?ci=9002> or <http://help.godaddy.com/article/419?>
- 7) Finish purchase process. Print out your confirmation receipt(s) and keep in a safe place with your website project folder.
- 8) After you have received the GoDaddy confirmation email(s), email your primary domain name to me, along with any other secondary domains you purchased for this project. Let me know if you need any secondary domains to redirect to your primary domain.

That's it; your part is done! Let me know if you have any questions or encounter any problems.
