

Purchasing Your GoDaddy® Economy Hosting Service*

Below are the steps to sign up for your basic GoDaddy® Economy Hosting service:

- 1) For your convenience, a direct link is provided on our website. Go to: <http://www.parrottalkdesign.com> and go to the **Helpful Links** page. Click on the “**The Power of the Penguin-World-Class Linux Hosting from GoDaddy.com**” text link in the lower left of the web page.
- 2) On GoDaddy’s Home page, under the “**Products**” tab, select “**Web Hosting**” in the drop-down menu of the “**Hosting**” button near the top.
- 3) On the next page, you’ll see three hosting plan options: Economy, Deluxe, and Ultimate. For your website project, you only need to purchase the **Economy** plan. Just ABOVE these plans, where it says “**Choose your Operating System:**” select the “**Linux®**” radio button (next to the penguin icon). Then, under the “Economy” section, select your desired monthly plan. (Note: A longer timeframe offers a greater discount and avoids the need to renew more often.) Then, click the orange “ADD TO CART” button below.
- 4) On the next page, SKIP ALL of the additional add-on options (unless you decide to purchase other products). If you are not purchasing other products, then scroll to the bottom of the page and click on the “No Thanks” orange button.
- 5) Next, on the “Review Your Shopping Cart” page, review all details. It should say “**Hosting - Grid - Economy - Linux-(timeframe term that you previously selected) (recurring)**” in your cart list. Check the Quantity and Price. Enter any promo code you may have and click the “Apply” text link. Then, click the “Continue To Checkout” orange button.
- 6) If you are already a GoDaddy customer, then log in. If not, create a new account. Write down your User ID, Customer Number, and password. You may need to create a 4-digit PIN. If so, write this down, too, and keep in a secure place.
NOTE: the password is case-sensitive, so please write down the upper & lower case letters exactly! For better security, it is recommended that your password contain both letters and numbers, with both upper & lower case letters.
- 7) Finish checkout process. Print out your confirmation receipt and keep in a safe place with your website project folder.
- 8) You may also receive an additional email from GoDaddy with your IP address. Please print this out and keep, too. After you have received the GoDaddy emails, please forward the emails to me and provide the following:
 - Customer number
 - User ID (if different from your customer number)
 - Password (case-sensitive, so please tell me upper & lower case letters exactly)
 - IP Address (an 11-digit number similar in format to this: 12.345.678.910)

Whew! That’s it; your part is done! I will take care of the rest of the set-up process. Let me know if you have any questions or encounter any problems.
